SEED CATALOG
For
THE DISCRIMINATING FLORIST
SEASON OF 1927 - 1928

PRIMULA OBCONICA "BERLIN SPECIALTY"

ISSUED BY

HERMANN GLIEME

1824 FOSTER AVE., CHICAGO, U. S. A.

FOREWORD

It is with great pleasure that I am sending to my customers this new price list. Many thanks are tendered old customers who have shown their approval of the quality of my seeds and my methods of serving them by repeated orders.

It shall always be my endeavor to supply you only with the very best seeds from European markets and my aim is to make my prices as low as is possible with high grade quality.

It is not always possible to deliver seeds at a definite date owing to the fact that the crops depend very much on weather conditions. In such cases a delay of necessity must occur; however, all orders will be filled as quickly as possible. I guarantee my stock to be absolutely fresh and for this reason of superior germinating qualities.

TERMS OF SALE

Cash should accompany all orders of \$50.00 or less, if not, goods will be shipped C. O. D. I will, however, open accounts for orders amounting to more than \$50.00 if credit is established. In such cases all accounts must be paid for by the first of the month following date of purchase. Any seeds not listed in the catalog will be procured for you direct from European Seed Centers. The time required is usually from eight to ten weeks.

All price quotations in this catalog will be void with the issue of a new catálog.

Yours for better seeds,

HERMANN GLIEME.

Aster

ASTERS (continued)

My collection of Asters comprises the most beautiful and perfect varieties in cultivation. All my seed has been produced in the establishment of Ernest Benary in Erfurt, Germany. The product of this grower took the first honors at the International Flower Show at Dresden this year. Purchasers of this seed will feel highly satisfied with the results they will obtain.

Queen of the Dwarfs (Early, very large flowering), 10 inches high.

White	Salmon	Scarlet
Crimson	Brown Violet	Azure Blue
Dark Blue	Brilliant Rose	Light Blue
	Mixture	

¼ oz. \$0.80, ½ oz. \$1.60, 1 oz. \$3.00

Sada Yakko Aster

Plant about 20 inches high, of pyramidal habit. Flowers delicate flesh-colored, resembling in shape and size somewhat the large-flowered Rose Aster, splendid.....	¼ oz.	½ oz.	1 oz.
	\$1.25	\$2.50	\$4.75

Early Flowering Hohenzollern (12 inches high)

Commencing to bloom the middle of June. Very useful for early cutting.

White	Rose	Crimson

Delicate Rose. Mixture80	1.60	3.00

Latest Novelty
BEGONIA
SEMPERFLORENS
ZAUBERIN

Latest Novelty
BEGONIA
SEMPERFLORENS
ZAUBERIN

This Begonia belongs to the dwarf varieties and is a profuse bloomer, producing an abundance of brilliant pink colored blooms. These plants attain a height of about six inches and grow into a bushy, round-shaped plant.

The extremely large flowers are carried umbrella-like above the dainty reddish foliage which is almost covered up by the flowers. The round and brilliantly pink blooms of about 2 inch diameter remind one of the Lorraine Begonia. In all my experience covering many years I have never seen a variety that gave more promise of conquering the American market.

"Zauberin" is a sport of "Fire, Sea" a variety introduced by me three years ago and which was a great success. There is no doubt that "Zauberin" will be an even greater success.

Trade packet, \$2.50. Five trade packets, \$11.00.

BEGONIAS

Latest Novelties

BEGONIA SEMPERFLORENS RUNDUNK (Benary)

This Begonia is a worthy companion to the Ruhm von Erfurt, introduced a few years ago. These plants will grow to a height of 12 inches, branch out considerable and are profuse bloomers. The blooms grow above the dark green foliage in large clusters. Their color is a clear brilliant red. I wish to state especially that the seed of this Begonia is obtained by crossing certain other varieties and for this reason will always make plants absolutely true to color and size.

Trade packet, \$1.50. Five trade packets, \$7.00.

BEGONIA SEMPERFLORENS ROSABELLA (Benary)

Begonia Semperfl. Rosabella

Among the large assortment of Begonia Semperflorens there has been lacking up to the present time a really low growing pink variety like compacta Rosea, Berta Bofinger, Delicata, Dornroschen. These varieties run very uneven in height and color and their flowers are rather small. After attempts at hybridizing, extending well over twelve years, a variety was obtained that will always bloom true to name. Rosabella will attain a height of about 6 inches, will branch out and the flowers are of very large size. The color of the grow very symmetrical. It blooms profusely and blooms is a clear brilliant light pink. Besides border work it will be in demand for pot plants as they are perfect substitutes for Lorraine Begonias.

Trade packet, \$1.50. Five trade packets, \$7.00.

Begonia Semperflorens

BEGONIA SEMPERFLORENS

I have always made a specialty of Begonia seeds, and have always been intent on securing the best the market affords. I wish to call attention to Begonia Glory of Erfurt and Fire Sea. I introduced both of these varieties about three years ago, and they still maintain their position as two of the very best varieties.

The best time for sowing Begonia seeds is from October to January in order to have flowering plants during the entire year. These plants always find willing buyers as they can be used for pot plants as well as for outdoor purposes.

	1/128 oz.	1/64 oz.	1/32 oz.

CINERARIA MULTIFLORA NANA

For commercial purposes the Cineraria Multiflora Nana ranks among the best. The blossoms are about an inch in diameter, and extend in large dense umbels above the delicate foliage. The plant grows very compact and for this reason requires much less space than other Cineraria plants.

The plant is not affected by rot of some of its leaves nor by damage done by snails because these leaves are replaced by new shoots without deforming the plant.

Cineraria Multiflora Nana plants reach a height of ten inches, and are considered one of the best pot plants in the market today.

If sown early enough they will bloom for Christmas, but the plants will be at their best between March and May.

CINERARIA HYBRIDA GRANDIFLORA MAXIMA

This plant attains a medium height. The large flowers in ten to twelve-inch umbels extend well over the foliage. The leaves are larger than those of Multiflora Nana, and for this reason Maxima is a more decorative plant.

It finds a very ready market for Mothers' Day sales.

Giant Triumph

PANSIES Giant Triumph

These new plants distinguish themselves by a strong growth forming compact bushes of round shape and conspicuous large foliage. Upon strong stems the five spotted petals of a completely round form elevate themselves above the foliage with an erect posture in a graceful manner. The extremely broad petals overlap in a manner giving the flower almost the appearance of being twofold. The edge of the petals of most of the flowers is neatly curled without injuring the erect posture of the flower.

The magnificence, the luster and the richness of the colors is very conspicuous, caused by the unique and very dark red and brown tone of colors. Upon each petal of the flower appears prominently the large extremely effective dark colored spot which is oftentimes surrounded by a conspicuously glowing variously colored border.

Exposition Phantasy Himalaya

EXPOSITION PHANTASY HIMALAYA (Ice Pansies)

Are receiving the highest awards. They are carrying off the world's record prizes. Ceaseless labor and experiments have produced these winter-flowering and sweet-smelling plants.

The first flowering sets in at the beginning of October, keeps right on during the whole of the fall until it snows, but they keep on flowering and blossoming under cover of snow, and just as soon as spring melts the ice and the snow and the rays of the sun shine upon them, they again unfold their glorious blossoms as if nothing had happened. The early and late, the almost continually blooming Giant World's Pansies certainly give the world an almost continuously flowering and charming ground cover, combining a late fall as well as an early spring covering.

PETUNIA GRANDIFLORA NANA (Latest Novelty—Benary)

(Large flowering dwarf Petunias)

Since my dwarf Petunias have enjoyed a large demand for them for years I have deemed it advisable to introduce a low growing, large-flowered Petunia of excellent qualities. The plants will attain a height of only 8 to 9 inches, branch out considerable but will grow in close formation making it unnecessary to tie them. The pretty round bushes carry their flowers well above the foliage. Their colors are white and dark purple or mixed in beautiful combinations. They are suited especially for pot plant purposes or can be used in flower beds.

Trade packet, \$2.00 Five trade packets, \$9.00

PETUNIA hybrida

Petunia hybrida grandiflora superbissima nana

Splendid mixture of new compact growing superbissima Petunias. The height of this strain is only $\frac{1}{2}$ or $\frac{2}{3}$ of that of the old class. The flowers are very large but substantial, owing to their rich undulation which renders them loose and attractive. The display of colors is an extraordinarily rich one showing all shades, some with deep dark throats as well as with the most lovely veining.

1/128 oz., \$2.00

1/64 oz., \$4.00

1/32 oz., \$8.00

Petunia hybrida grandiflora double

DOUBLE FLOWERING PETUNIAS

As the seed of the double varieties is obtained by hybridization, it will not produce all double flowers, but the singles will be unusually fine. The weaker seedlings should receive great care, as they produce the finest double flowers.

PETUNIA hybrida grandiflora fl. pleno (double, large flowered)

**Double Wallflower
Fruehwunder**

WALLFLOWER (Goldlack)

Double Fruehwunder (Latest Novelty)

Planted in January or February, these plants will bloom in June, planted in March they will bloom in July, etc., Thus, it will be seen that it is possible to have blooming plants during the entire year. It is to best advantage to sow in June, July, August and September in order to have blooming plants outside in the fall or in the cool houses in winter or spring. Fruehwunder will grow to a height of 30 inches. It will branch out, these branches also being laden with beautiful flowers which are well suited for cut flower purposes during the cool season.

This new variety comes in Canary Yellow, Gold Yellow, Bronze, Light Brown and Dark Brown. Seeds may be had in a mixture of the above or in Gold Yellow or Brown only.

Trade packet, \$1.50. Five trade packets, \$7.00.

	1/4 oz.	1/2 oz.	1 oz.
